

## **How to Enable Closed-Captioned in English with Google Chrome**

To watch a live stream on YouTube with closed-captioned (CC) in English, please follow the below instructions. *(For use with Google Chrome only.)*

- Make sure your Google Chrome browser is up-to-date by clicking on the three-dot menu (or kebab menu) in the top right corner of your browser. Follow instructions if relaunch is needed.
- Once updated, click again on the three-dot menu and click **SETTINGS** at the bottom of the pop-up menu that appears. This will open a new tab called **SETTINGS** in your browser.
- In the **SETTINGS** left-side menu, click **ADVANCED** and then **ACCESSIBILITY**.
- In the **ACCESSIBILITY** options, turn on the first item called **LIVE CAPTION** using the toggle. Once **LIVE CAPTION** is turned on, you may exit the **SETTINGS**.
- After that, anytime you view a live video, Google will display a dark gray rectangle window in the bottom center of your screen with the CC running. You can close the CC window using the X or move it around on your screen as needed.
